ADDENDUM NO. 1

(to be added to and made part of the Tender Documents)

The following changes or modifications shall be made to the Tender Documents:

TO 1.0 INTRODUCTION

1.1 Background, add the following information.

Additional asbestos tests were undertaken throughout the building with only one sample found to have contained asbestos. This was a sample taken from 9” tiles in the gymnasium foyer flooring, being found as having 1-5% asbestos. As this material only poses a problem when being drilled, sawed or sanded (causing particles to become air-born), this material is safe to landfill. A Construction and Demolition Debris Guide can be obtained from local Nova Scotia Department of Environment Offices. The Town of Kentville reserves the right to salvage any materials within the existing building up until 7:00 am on Wednesday, February 20, 2013.

Fred Whynot, P. Eng.
Director of Engineering & Works
