**FOR IMMEDIATE RELEASE: Thursday March 26, 2016**

**RE: Town of Kentville Water Supply**

KENTVILLE, NOVA SCOTIA -

The Town of Kentville wishes to advise customers of the Kentville Water Commission that the protected Magee Lake Watershed does not currently supply water to the system. It has been recently reported that the Magee Lake Watershed supplies water to the Town of Kentville. This is no longer true. The Magee Lake water supply was disconnected in 2002 and the watershed is only considered as a potential source of future water should this be needed. Although this option is not anticipated for many decades, the Kentville Water Commission continues to protect this resource.

The Town is issuing this release in response to recent media reports regarding the C&D Site on the North River Road and its proximity to the Lake and former system.
