Solid Waste is collected through the Authority Collection program provided it is source-separated and set out according to the By-law and these By-law Directives.

All Eligible Premises are subject to the same source-separation requirements, set-out limits, and Collection Container requirements. It is the responsibility of the Owner or Occupant to provide for collection and disposal of materials which are not eligible for Authority Collection or which exceed the allowable limits.

3.1 Eligible Premises

The basic unit of Authority Collection is a property, or Eligible Premises. To be deemed an Eligible Premises, a premises must be in compliance with applicable municipal zoning and development requirements, and property taxes levied to date must be paid. In the case of federal lands for which property taxes are not paid, premises may be deemed Eligible Premises if an agreement is in effect to provide waste management services on those lands.

Residential Premises eligible for Authority Collection include self-contained long-term living accommodations containing kitchen facilities in which the Occupant(s) sleep, cook, and eat meals. Each such unit is one Eligible Premises.

Industrial Commercial and Institutional (IC&I) Eligible Premises may include a variety of industrial, commercial or institutional enterprises or organizations including home occupation businesses. An IC&I serviced unit must:

- public wharves: a wharf is one Eligible Premises
- cemeteries: a cemetery is one Eligible Premises
- seasonal agricultural worker accommodations where Occupants eat, sleep and prepare their meals

3.6 Curbside Inspection of Solid Waste Setouts

Inspection Guidelines

Authority staff regularly inspect waste materials set out for collection as a means of assessing compliance with the By-law and the source-separation and waste container Directives.

When the Inspector finds improperly sorted or packaged material set out for collection, the inspector may respond with educational tools including leaving the waste with an information sticker, and follow-up communication with the Occupant or Owner of the property.

Repeated subsequent violations, depending on their severity, may result in a more serious penalty as set out in the By-law, such a By-law Ticket or the suspension of the collection service.

Bulky Items such as furniture, stoves, mattresses, scrap metal, bed springs, barrels, water tanks, dishwashers, clothes, washers and dryers, pieces of fencing, refrigerators, freezers, air conditioners (with a "CFC refrigerant-free" sticker) and debris from home renovations are not collected roadside during regular Authority Collection days.

The By-law requires the generator to source-separate their waste. There is no exception for waste generated at a public event where Public Waste is generated, or a private event such as a wedding, family reunion or other such gathering at a home, or other public or private venue.

The By-law defines Public Waste as:

Public Waste means Solid Waste generated in or on premises where the public is or would normally be responsible for Disposing of waste including, without limitation, enclosed or exterior shopping centres, malls, food courts, quick-service or counter-service restaurants, sports arenas, office or other commercial premises, retail premises, private or public parks or campgrounds, and inside or outside public event venues;

It is challenging for businesses or special event managers to control the actions of the public or invited guests who use their facilities or attend their events. Public education and cooperation between the public, guests, the manager, staff, the waste hauler and the Authority key to successfully managing Public Waste. Similar guidelines apply also to operators of private events such as private parties, family events and the like.

Event organizers may contact the Authority for information and borrow sorting stations. It is the responsibility of event operators to Dispose of materials collected in borrowed sorting stations. The event organizer is also responsible for picking up, cleaning and returning borrowed sorting stations.

Guidelines for Managing Public Waste

in any staff-controlled area all waste shall be source-separated
where waste is not under staff control, the business or event manager shall exercise due diligence to provide the public with conveniently located Source-Separation containers
Labels and signage shall be posted indicating what materials should be placed in each container to help the public know where to correctly place their waste
public washroom waste is considered Residual Waste and there is no requirement to sort it
all waste delivered to Management Centres is subject to inspection and compliance measures
The Authority staff are available to provide advice on setting up a Public Waste sorting system
on request, the Authority lends sorting stations to event organizers

6.0 Management Centres

The Authority operates two Waste Management Centres, one at 100 Donald E. Hiltz Connector Road, in Kentville and one at 343 Elliot Road, south of Exit 19 off Highway 101 near the Village of Lawrencetown. 6.3 Waste Disposal Fee Structure

The following provisions apply to the waste disposal fee structure:

The Authority shall stipulate the fees and charges for disposing materials at its waste management facilities. These fees shall be set from time to time by the Authority and displayed in a Fee Schedule (see attached sample in Schedule 1 (a));

The applicable disposal fee shall be paid by the hauler who delivers the waste to the Waste-Resource Management Centre;

Haulers or waste generators wishing to Dispose of materials requiring special handling or disposal techniques shall give the Authority 48 hours' notice requesting permission to deposit such special wastes, stating the properties, characteristics, origins and amounts of the waste. Authority staff shall advise the hauler whether the waste is acceptable and, if so, under what conditions; and

No waste disposal fees shall apply to waste collected from Eligible Premises by the collection contractor(s) engaged by the Authority to undertake the Authority Collection program.

6.4 Haulage Vehicle Registration

Commercial haulers using the Authority's Waste-Resource Management Centres may be required to comply with the registration requirements of the Authority including vehicle registration for such haulers.

The following provisions may apply to vehicle registration for haulers using the Authority's Waste-Resource Management Centres:

- a. Haulers using the Authority's waste management facilities shall pre-register identifying information and the tare weight of each vehicle as required by the Authority from time to time, and separately identify those vehicles to be used in contracted Authority Collection services operated on behalf of the Authority (if the hauler is also a commercial collection contractor);
- b. Haulers who wish to be granted credit privileges with the Authority must register adequate information with the Authority. Each hauler will be assigned an account number and each vehicle may be assigned a unique identification number that shall be displayed on the left front of the vehicle in a location, size and format specified by the Manager; and
- c. The driver of each registered vehicle must present the assigned account number to the scale operator upon entering the facility. The hauler in whose name the account is registered will be invoiced for materials delivered under that account.

6.5 Waste packaging and placement requirements

Waste materials may be brought to the Waste-Resource Management Centre either bagged, bundled or loose. For bagged materials, Recyclables must be in blue or clear bags,

compostables in Green Carts or compostable bags for Organics, and Residual Waste in clear bags. In case of Recyclables or Residual Waste brought in cardboard boxes, the boxes must be emptied by the user.

All Solid Waste shall be placed in appropriate designated locations for each type of Source-Separated Solid waste. Failing to do so is an offence contrary to section 6.8 of the By-law.

6.6 Fee Payment

Haulers who transport acceptable material to a facility operated by the Authority, either with his/her own vehicles, or through his/her contractors or agents shall pay tipping fee charges in cash, by credit card, or by current electronic payment technology available at the site or, if they have been granted credit privileges, upon invoice in accordance with sections a, b, and c below:

- a. When both inbound and outbound scales are operating, the vehicle will be weighed upon entering the facility and shall be weighed again upon leaving. The hauler will pay the fee in accordance with the current fee structure prior to leaving the facility, or upon receipt of an invoice if the hauler has been granted credit privileges;
- b. When only one scale is in operation and the tare weight of a vehicle transporting materials has been predetermined, payment in accordance with the fee structure is required upon being weighed prior to leaving the facility, or upon receipt of an invoice if the hauler has been granted credit privileges; and
- c. When only one scale is in operation and the tare weight of a vehicle transporting materials for disposal has not been predetermined, the vehicle will be weighed upon entering the facility and again upon leaving. The hauler will then pay the tipping fee in accordance with the fee structure set from time to time by the Authority prior to leaving the facility, or upon receipt of an invoice if the hauler has been granted credit privileges.

Haulers who have been granted credit privileges are subject to the current Overdue Account Collection Policy.

6.7 Volume Based Tipping Fees

The General Manager shall set per cubic-meter rates payable by the haulers to be used when the weigh scales at the Waste-Resource Management Centres become inoperative. These shall be applied based on the capacity of the vehicle and the volume of the material in the vehicle as estimated by the scale operator, and shall be based on material weights displayed in Schedule 1(b) Volume-based Tipping Fee Calculation.

6.8 Inspection and Compliance Guidelines

Waste at the Waste-Resource Management Centres may be inspected to ensure compliance with the source-separation and waste packaging requirements established by provincial regulation, the By-law, and operational rules of the Waste-Resource Management Centres.

Based on a visual inspection, random selection or other factors, Waste-Resource Management Centre staff may choose a load for thorough screening. Waste screening normally means removing bagged waste or individual items from a load for careful examination to assess compliance and to identify the waste generator(s).

As provided in section 7.4 of the By-law, inspection staff have the authority to request the names of all customers whose waste is contained in commercial loads being inspected.

Non-compliant materials located in a load are communicated to the hauler, customer or generator of the waste.

Non-compliant materials located in a load may also result in any penalty detailed in the By-law, including without limitation, a Warning, a By-law Ticket, a double tipping fee, or rejection of the load and sending it back to the generator for corrective action before it can be accepted at the Waste-Resource Management Centre.

7.0 By-law Enforcement

7.1 Compliance Philosophy

Authority staff use a balance of education and enforcement strategies to improve compliance with municipal By-laws and provincial regulations. Providing information and assistance to citizens and businesses is the first step in achieving compliance, followed if necessary by progressive enforcement action such as written notice, Warnings, fines and charges laid by investigators to be dealt with according to law in Provincial or Supreme Court.

7.2 Enforcement Tools and Procedures

The graduated enforcement response has been developed to address cases of failure to comply with the requirements of the By-law and Directives.

The tools used by enforcement staff range from verbal communication, written notice with specific deadlines, Warnings, suspension of curbside waste collection, Notices of Violation providing for an administrative out-of-court settlement (By-law Tickets), Summary Offence Tickets (SOTs) and Long Form Information charges in Provincial Court.

The enforcement tools are chosen based on the type and severity of offence and are at the discretion of the enforcement staff and in accordance with the Offence Enforcement and Penalties provisions of this By-law.

7.3 Investigation

All complaints and information concerning alleged violations of the By-law received are prioritized and investigated as quickly as resources allow. As needed, during the investigation, enforcement staff will work closely with other Authority staff, municipal staff, Nova Scotia Environment Inspectors, and with the local police agencies.

The By-law Enforcement Officer shall be qualified as a Special Constable under the Nova Scotia Police Act, be a member of the Atlantic Bylaw Officers Association (ABOA) and shall participate in enforcement and compliance training opportunities.

Schedule 1(b)
Volume Based Tipping Fee Calculation

It may be necessary at times to operate one or both of the Waste-Resource Management Centres with inoperable scales – for example, during an emergency such as a major power failure. In such a circumstance it would be impossible to charge tipping fees based on incoming weights. Volume-based fees are one option.

The following table details conversion factors that the scale operator can use to calculate fees based on the type and volume of the material on the delivery truck.
